Savarez

EXCLUSIVE ECO-FRIENDLY LEATHER

These guitar straps were made entirely by hand, in the heart of the Drôme in France. Specially designed for Savarez, **these straps are made from ecological leather and come in several different exclusive colors.**

These straps are not only high quality, but they are also made from the most environmentally friendly and healthiest industrially produced Ecopell leather.

The leather in the Nappa and Velours collections, as well as all Ecopell lining leathers, have been certified by the International Association of the Natural Textile Industry. The IVN assesses not only the product, but also all associated production steps - from aging to tanning to disposal of wastewater.

Ecopell can be described as one of the most environmentally friendly and skin-friendly leathers on the market.

The straps are soft to the touch, and their inside padding makes them very comfortable to wear, musicians will love the way it helps them easily sustain the weight of their instrument.

Savarez straps are available in 6 and 8 cm widths with an adjustable length from 115cm to 130cm.
