

• CANTIGA PREMIUM WHAT'S NEW ? •

The new Cantiga Premium basses come from the discovery of a new high-performance metal and new raw materials that give them new and very significant characteristics. This metal is associated and wound with the exclusive «CANTIGA» core that have made their worldwide success.

The composition of the «CANTIGA PREMIUM» Basses has been modified according to the new high-tech raw materials used. They belong to the «CANTIGA» family. The precision required for their production lead to the construction of new machines.

They offer an amazing presence of the basses, a dense and deep sound (a special mention for the Mi 6th) which remain perfectly balanced with the trebles strings.

The enriched overtones spectrum offers a bright sound without aggressivity. The higher harmonics last longer in the same way as the basses and mediums.

The extensive possibilities of nuances and sound colors efficiently support the vibrato and the emission of harmonic notes.

These fundamental qualities are complemented by an extended life and a quick and easy answer in pianissimo as in fortissimo without saturation.

Performed in concert at the highest level for almost 2 years the New «CANTIGA PREMIUM» basses have already gained a worldwide reputation.

• THEY WROTE TO US •

« The new Savarez Cantiga Premium basses string are **FABULOUS, FANTASTIC !!!** I will use them in the Japan tour. »

« The sound is fantastic I play these strings for over three months, they are still in a perfect condition »

« This new Savarez Cantiga Premium set is the best of the best. He is so powerful, brilliant ... The set offer so much colors and nuances. The strings are just perfect!! »
